

Third-Party Library Inventory — AI Email Reply Generator

Company: MDS LLC **Last Updated:** May 7, 2026

Production Dependencies

None.

The AI Email Reply Generator uses no third-party JavaScript libraries, Apex libraries, or external dependencies in the distributed managed package. All components are built using:

- Native Lightning Web Components (LWC) framework
- Salesforce Lightning Design System (SLDS)
- Standard Apex platform libraries (System , Messaging , Database , Security)

No external CSS frameworks, UI libraries, charting libraries, or utility packages are included.

Development-Only Dependencies

The following packages are used exclusively during development and testing. They are **not included** in the distributed managed package.

Package	Version	Purpose	License
jest	^29.7.0	JavaScript testing framework	MIT
@lwc/jest-preset	^16.0.0	LWC Jest testing preset	MIT
@salesforce/sfdx-lwc-jest	^5.1.0	Salesforce LWC Jest integration	BSD-3-Clause
eslint	^9.39.4	JavaScript/LWC linter	MIT
@lwc/eslint-plugin-lwc	^3.5.0	ESLint rules for LWC	MIT
@salesforce/eslint-config-lwc	^4.1.2	Salesforce LWC ESLint config	BSD-3-Clause
@salesforce/eslint-plugin-lightning	^2.0.0	ESLint rules for Lightning components	BSD-3-Clause
eslint-plugin-import	^2.32.0	ESLint import/export rules	MIT

Package	Version	Purpose	License
eslint-plugin-jest	^28.14.0	ESLint rules for Jest tests	MIT
husky	^9.1.7	Git hooks (pre-commit lint + test)	MIT
lint-staged	^16.4.0	Run linters on staged files pre-commit	MIT

These are declared as `devDependencies` in `package.json` and are used for running LWC Jest tests during development only.

External Services

The App makes HTTP callouts to external AI providers, but these are:

- Configured entirely by the customer (BYOK model)
- Routed through Salesforce Named Credentials
- Not bundled as libraries or SDKs in the package

No AI provider SDK, HTTP client library, or API wrapper is included. All HTTP communication uses the native Salesforce `Http` , `HttpRequest` , and `HttpResponse` Apex classes.
